

Colorado - Fibershield® fire curtains (Brisbane, Queensland)

Problem

Five (5) continuous levels of inter-connecting stairs within the building.

Solution

Fibershield® automatic fire curtains provided to allow for an open plan office (in non-fire mode) but to give effective fire separation in fire mode.

Design Considerations

AS1530 Part 4 fire test data, AS1905 Part 2 approvals providing confidence of a suitable level of performance whilst maintaining the aesthetically pleasing nature of the design (without bottom bar sag) for the life of the building.

Client

Colorado Group

Builder

Built (Queensland)

Fire Safety Engineer

Lincolne Scott (Brisbane)

*Note: Each project is unique and usually requires the involvement of a Fire Safety Engineer.
Please contact us to discuss the suitability of this solution for your project.*

smoke containment screens • smoke curtains • smoke & heat release vents • smoke dampers
• smoke seals • smoke doors • smoke & fire cavity barriers • fire curtains • Dorgard
