DANNY DOOLAN ' S PUB

AUCKLAND, NZ

smoke containment screens • smoke curtains • fire curtains • horizontal fire curtains • smoke & heat release vents • natural ventilation • fire resistant glazing • horizontal glazing • smoke doors • fire doors • intumescent paint & other specialty systems

projectoverview

Problem

Egress path (escape route) from the downstairs night club impeded the existing non-fire resistant window in the ground floor facade.

Solution

Fibershield Automatic Fire Curtains were retrofitted over the existing window.

Design Considerations

Relatively unobtrusive fixtures consisting of a compact header box and side guides allowed the system to be aesthetically pleasing and incorporated into the building facade.

Client

Danny Doolan

Fire Engineer

Holmes Fire and Safety (Auckland)

Problem

Windows in the building were located over another adjacent building.

Solution

Installation of a 6m wide x 3m high Fibershield Fire Curtain over a window.

Design Considerations

The system was installed internally to allow easy access for maintenance and therefore was required to be invisible in non-fire mode.
